

Lindenwold High School  
IPT Meeting  
SMART Response  
February 23, 2011

- ❖ SMART Response (aka "Senteo") assessment
  - ✓ Review data from the assessment
- ❖ Make a SMART assessment
- ❖ Learn how to make a class list
- ❖ SMART board tips

## SMART Response System

### How to get started:

1. Click the SMART response system icon (gold button) located on the lower right hand tool bar.
2. Click on Teacher Tools (2<sup>nd</sup> choice from the top).
3. A screen will appear, you will see "start a class" with a drag down menu, choose the class that you want to start.
4. Students turn on their clickers
  - \* they will join the appropriate class
  - \* they will enter their pre-assigned ID
  - \* they will confirm
5. Choose your pre-designed assessment.
6. Click on the SMART response icon on the left hand side (same gold button as on the lower right hand tool bar).
7. Click "start this assessment now". The students' clickers will now have question numbers appear.
8. Helpful hints:
  - \* To advance the screen, click the forward arrow on the lower right hand corner.
  - \* To see student progress, click the progress tab
9. When you have completed the assessment, click "stop this assessment now".
10. Turn off all clickers by clicking on "Stop Class" on SMART response teacher tools page.

## SMART Response System

### Downloading Results

1. Click the SMART response system icon (gold button) located on the lower right hand tool bar.
2. Click on Teacher Tools (2<sup>nd</sup> choice from the top).
3. A screen will appear, you will see "start a class" with a drag down menu, choose the class from which you want the results, and click on "To work with class lists, assessments and reports, switch to Gradebook view".
4. Go to the last choice "View student performance report".
5. On the left margin, you may choose either individual student performance or class performance. It will automatically default to individual student performance.

### Individual Student Performance

- A. On the main page, choose the class the student is enrolled in from the drag down menu. (you may choose all students), select your assessment types (or you may choose all assessments).
- B. Choose where you would like the report saved by using the browse button and click "create" on the lower left. You will now be able to see the report(s) you have created in your chosen place.

### Class Performance

- A. On the left margin, choose "class performance".
- B. On the main page, choose the specific class (or all classes) from the drag down menu and the assessment type.
- C. Choose where you would like the report saved by using the browse button and click "create" on the lower left. You will now be able to see the report(s) you have created in your chosen place.

## SMART Response System

### Adding students:

1. Click the SMART response system icon (gold button) located on the lower right hand tool bar.
2. Click on Teacher Tools (2<sup>nd</sup> choice from the top).
3. A screen will appear, click on "To work with class lists, assessments and reports, switch to Gradebook view"
4. Under next steps, click the first choice "Add a class"
5. Add appropriate fields, those with an asterisk must be filled in. Click "add".
6. On the top tabs, choose the second choice "students"
7. Helpful hint: on the upper right, click on the shut eye that says "privacy on", that will open up the eye for "privacy off" (this will enable you to see as you are typing).
8. Click on the top line, add a unique ID ~ student IDs are fine, but long for students to key in. Suggestion: use their assigned calculator number, but precede that number with the period number (i.e. 11 for student 1 in your first period class; 21 for student 1 in your second period class).
9. Proceed until all names have been entered.

\*NOTE - you do not need the SMART Response hardware when entering class lists.

## SMART Response System

### Adding students using their student ID:

CAUTION: many students do not know their student ID numbers and it is lengthy for the students to enter in correctly.

### REAL TIME SECTION

1. Find the course section from Real Time gradebook (i.e. LMS \_\_\_\_/\_\_\_\_)
2. Under the student data tab, go to search, go to students.
3. Enter the course section number in the appropriate field.
4. Click "find students".
5. Click on the excel spreadsheet icon on the bottom right.
6. Click on the circle next to save file.
7. The data base will appear, name the file, save somewhere (desktop, u-drive, etc).

### SMART Response Section

1. Click the SMART response system icon (gold button) located on the lower right hand tool bar.
2. Click on Teacher Tools (2<sup>nd</sup> choice from the top).
3. A screen will appear, click on "To work with class lists, assessments and reports, switch to Gradebook view"
4. Under next steps, click the first choice "Add a class".
